Bulky cable is no more necessary now!!
Use our CCTV/VGA Balun
Extend the Video/VGA Signal
Up to 2200ft through Cat 5 cable

VideoEase CCTV Balun

Eliminates coax cable
Up to 2200 feet via Cat 5 UTP

Overview

The VideoEase CCTV Balun allows a single CCTV video signal to be transmitted via cost-effective unshielded twisted pair (UTP) cable.

Used in pairs, the CCTV Balun eliminates costly and bulky coaxial cable, allowing CCTV security and surveillance equipment to be connected using standard structured cabling techniques for neater and more streamlined cabling.

The CCTV Balun is available in two models; CCTV Screw Terminal Balun (500009) and Modular CCTV Balun (500000). Both models may be used interchangeably.

VideoEase VGA Balun

Overview

The VideoEase VGA Balun eliminates costly and bulky VGA cable, allowing a VGA source to be connected to a VGA monitor via 4-pair Cat 5 twisted pair cable. Shielded twisted pair is recommended. Used in pairs, the VGA Balun allows VGA video to be transmitted up to 450ft (137m) via Cat 5 at resolution 640 x 480 pixels.

Each VGA connection requires a VGA Balun at the source (500010) and a VGA Balun (500011 or 500014) at the display. For reliable operation, Category 5 or better shielded twisted pair is recommended for use with the product.

The VGA Balun works in conjunction with laptops, PCs, CRT and flat-screen LCD monitors and multimedia projectors. Typical applications include corporate projection systems, classroom video instruction and video information systems.
